**DETAILED ACTION**

***Specification***

1. The disclosure is objected to because of the following informalities: referring to p. 10 of the specification:

First sentence "In addition, a quantity in item b auction of four units. This matches with demand at 14.75 for item b." is unclear because it is grammatically incorrect and "item b" is not referenced anywhere in the specification.

Appropriate correction is required.

***Claim Rejections - 35 USC §101***

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requires of this title.

3. Claims 1-24 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

4. The invention(s) as recited in the claims is merely an abstract idea that is not within the technological arts. Mere ideas in the abstract (i.e., abstract idea, law of nature, natural phenomena) that do not apply, involve, use, or advance the technological arts fail to promote the "progress of science

Art Unit: 3624

and the useful arts" (i.e., the physical sciences as opposed to social sciences, for example) and therefore are found to be non-statutory subject matter.

5. To resolve this deficiency, the claimed (preamble and the method steps) must be recited in such a manner that critical elements of the claimed invention are performed by a computer and/or the data communication network. No new matters should be added.

***Claim Rejections - 35 USC § 112***

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

8. Claim 1 recites the limitation "said generic set of fungible items" in lines 10-11. There is insufficient antecedent basis for this limitation in the claim. Note that the claim refers to limitation "generic fungible items" in the preamble and line 3.

9. Dependent claims 2-24 also inherit this deficiency.
